LET US SING

Beyond the Universe

I dream of flying **beyond** the Earth,
amidst the planets and the countless stars.
I would stop by the red planet Mars,
here we dream of a home away from home.

Fly on, to watch the Saturn,
with its ring and moons.
Then, I stopped by Jupiter, **marvelled**,
by its red storms that look like **marbles**.

Hurdling through a belt of asteroids,
I crossed Uranus, without a fuss.
To Neptune, the blue ice giant,
Further high, I fly, beyond the galaxy.

To meet the creator,
Of this **Magnificent** display.
To take me beyond the Milky Way,
To voyage across the galaxies.
