Cylinder

Properties:

- It is a 3D shape.
- Two bases lie in upper and lower surfaces in a cylinder.
- Height is the distance between the two bases.

Examples:

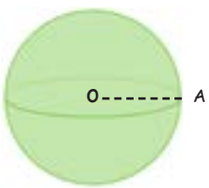

OA = OB = OC = OD = Radius
AC = BD = height

Examples:

OA-radius
O-Centre point

Sphere

Properties:

- It is a 3D shape.
- It has one surface.
- All points on the surface are at the same distance from the centre.
- It has no vertices and edges.

Cone

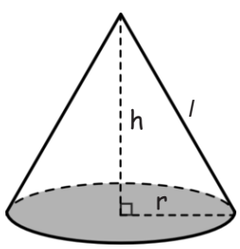

Properties:

- It is a 3D Shape.
- It has a circle in its base.
- The distance from the top of the cone to the centre of the base is called as height.
- The distance from the apex to any point lying on the circumference of base is called as slant height.
- The height and slant height are not equal.

Examples:

l-slant height
h-height
r-radius
