

7OTYX

Introduction

The main aim of this information processing is to enable the learners to count, compare and assume information such as invitees coming to attend a birthday party, sort out the class library books, food production, the number of pupils taking food in the mid-day meal scheme and the various occupations of their parents.

Example

A fifth standard teacher asked a student named Dinu to collect the pictures of favourite sports articles of his clasmates and Dinu collected the same and handed it over to the teacher in a short span of time. Let us see how is it possible for him to do it quickly.

The teacher asked few questions about his collection and Dinu was able to answer those questions quickly. Let us find what Dinu did to answer the questions quickly.
