6.3 Pictograph

Information can be easily understood when it is represented in pictures.

A **pictograph** is the representation of data using pictures. Pictographs represent the frequency of data using symbols or images that are relevant to the data. This is one of the simplest ways to represent data.

Example

Information collected from 150 students about their favourite subjects are given below. Make a pictograph based on it:

Subject	Number of students
Tamil	25
English	20
Maths	55
Science	35
Social sciences	15

 = 5 students

Subject	Number of students
Tamil	
English	
Maths	
Science	
Social science
