2.5 Life Applications Of L.C.M

Example

Raja is a cloth seller. Suja is a Bangle seller both of them started from their native place of trichy for selling. Raja returned after 8 days, suja returned after 6 days, when they will meet at trichy if they started in same day?

Solution:

We have to find L.C.M

L.C.M of 8, 6

2	8
2	4
2	2
	1

$8 = \boxed{2} \times \boxed{2} \times 2$

$6 = \boxed{2} \times \boxed{3}$

L.C.M of 8, 6 = 2X2x2X3

= 24

They both will meet 24th day at Trichy.

Exercise 2.2

T6H3E9

1 Choose the best answer:

(i) The number divisible by 5 with no remainder

a. 14 **b.** 535 **c.** 447 **d.** 316

(ii) Pick the number which is not a multiple of 6.

a. 18 **b.** 26 **c.** 72 **d.** 36

(iii) The common multiple of 4 and 8 among the given number is.

a. 32 **b.** 84 **c.** 68 **d.** 76

(iV) Factors of 6

a. 1, 2, 3 **b.** 1, 6 **c.** 1,2,3,6 **d.** 2,3
