Multiplication in capacity

Example

Multiply the following:

4 l 200 ml x 3

	l	ml
	4	200
x		3
	12	**600**

4 l 200 ml x 3 = 12 l 600 ml

Try this
2 l 250 ml x 2

Example

Deepak fills 1 litre 500 ml petrol in a day. How much amount of petrol will he fill in 5 days?

Solution:

		l	ml
Petrol filled by Deepak in a day	=	1	500
Petrol filled by Deepak in 5 days	=	x	5
Total quantity of petrol	=	**7**	**500**

Division in capacity

Examples

(i) 2 l 320 ml ÷ 2

```
          l   ml
          1   160
    2 |   2   320
      | - 2
      |        3
      | -      2
      |       12
      |       12
      |        0
```

2 l 320 ml ÷ 2 = 1 l 160 ml

Try this
18 l 240 ml ÷ 6
