

To know the volume of a solid body by informal measurement

Situation 1

Venba's uncle gave her a sweet box. The sweet box contains 10 pieces of soan papdi. Now, we can tell that the capacity of the sweet box is 10 soan papdi. So, we can tell that the volume of that sweet box is the space occupied by 10 pieces of soan papdi.

G5H1T2

Situation 2

Kuralini arranged her books in her school bag. She kept five books in her bag. Hence, we can say that the capacity of the bag is 5 books.
