3 Need for Proper Disposal of Waste

With so much of wastes lying everywhere, what do you think that we should do? We urgently need a proper waste management system. Waste management is needed for the following reasons.

To control pollution

- Various pollutions like water pollution, air pollution and soil pollution can be avoided.

To conserve natural resources

- Waste disposal is important for the conservation of our environmental resources like forest, minerals and water.

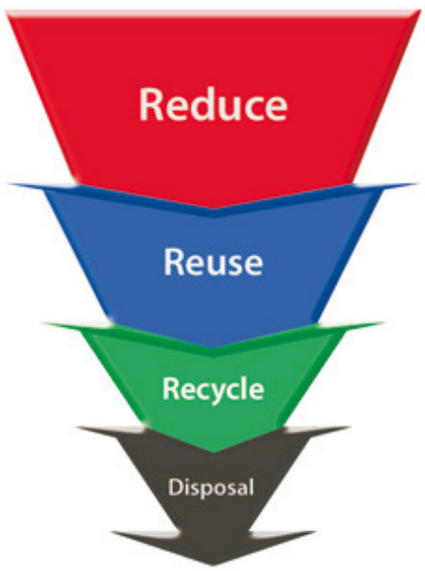

To control spread of diseases

- Spread of infectious diseases can be controlled.

Recycle for further use

- Wastes can be recycled to get products for further use.

4 Ways to Reduce Waste

The best place to start difference is our home. We need to learn how to reduce, reuse and recycle wastes. The following practices will be helpful to reduce wastes in our home and school environment.

- Use reusable and recyclable bags and containers.
- Avoid one time use items and use items which can be used permanently.
- Segregate wastes into bio-degradable and non-biodegradable items and hand over them to the municipal and corporation people who collect them.
- Do not throw away your wastes every where. Put them in dustbins and dispose them properly.
- Don't waste food. Waste food in schools can be collected and used to feed cattles.
- Organic wastes can be converted into manures.
