❖ Worker Bees

These are sterile female bees and the smallest members of the colony. These bees are very active. Their function is to collect honey, look after the young ones, clean the comb, defend the hive and maintain the temperature of the bee hive. Life span of worker bee is six weeks.

Do you know?

- One queen bee has to fly 90000 miles three times around the globe to make one pound of honey.
- Honey bee can fly up to six miles and as fast as 15 miles per hour.

2 Useful products from Honey Bees

Honey and bee wax are obtained from honey bees. Other products which are obtained from bees are bee venom, propolis and royal jelly.

❖ Honey

Honey is a sweet, viscous, edible natural food product. It contains proteins, free amino acids, vitamins and minerals like calcium, iron, phosphorus and manganese. The following are the uses of honey bees.

Do you know?

Honey is the exciting source of natural sweet. It is also called as 'Liquid Gold'.

- Honey has an antiseptic and antibacterial property. It is an antibiotic.
- It helps in building up haemoglobin content in the blood.
- It is used in Ayurvedic and Unani system of medicines.
- It prevents cough, cold, fever and relieves sore throat.
- It enhances digestion and appetite.
- It provides essential aminoacids required for the growth of the body.

❖ Bee wax

Bee wax is secreted by the wax glands of worker bee to construct the combs of bee hive. Some of the uses of bee wax are given below.

- It is widely used in cosmetic industry.
- The wax is used in the preparation of shoe polish and manufacture of cold creams, lipsticks, candles and lubricants.
- It is also used in the preparation of ointments and in pharmaceutical industry.
