3) Wind

The air which moves horizontally from high pressure area to low pressure area is called **wind.** Air never moves in one direction. It differs from place to place and time to time. This is due to the rotation of the earth.

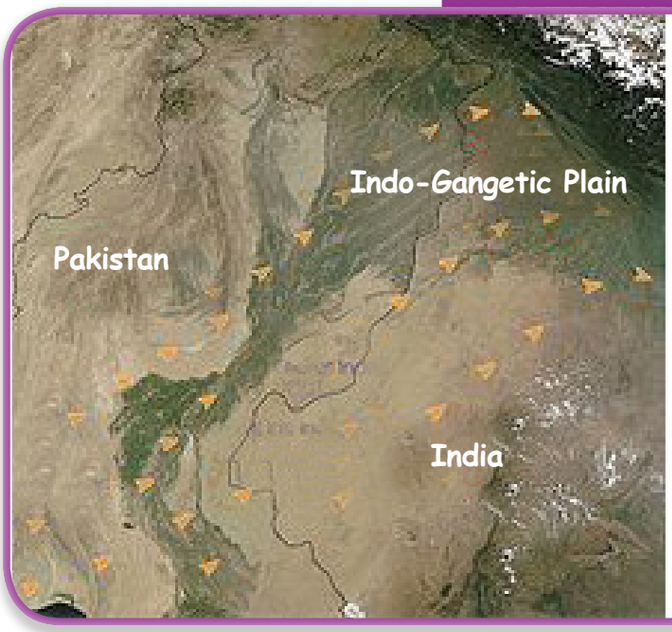

Wind energy is a form of renewable energy. Wind turbines converts the kinetic energy into **mechanical energy.** A generator can convert mechanical energy into **electrical energy.**

Wind Mill

Loo Wind

Loo Wind

Loo is a strong, dusty, hot and dry summer wind which blows over the **North Western India** during the months of May and June.
