Rivers:

Rivers are large streams that flow over the land. Rivers are fresh water bodies which generally begin at mountainous areas. They usually drain in oceans or seas.

Example: Ganga and cauvery.

Lakes:

A **lake** is a water body surrounded by land on all sides. Lakes can have salt or fresh water.

Example: Dal Lake.

Gulf:

A **gulf** is a large area of an ocean or a sea that is surrounded by land.

Example: Gulf of kuchch.

Bay:

A **bay** is a body of water, which is partially enclosed by land. It has a wide mouthed opening of land, and is joined to the sea or other large water bodies.

Example: Bay of Bengal.

Sambhar Salt Lake in Rajasthan is one of the important inland salt water lake in India.

Name some water bodies in your locality?
